## Cities & Regions Pavilion - TAP2015

---

### About the Cities & Regions Pavilion – TAP2015

As the central point for cities and regions at COP21, the Cities & Regions Pavilion – TAP2015 invites mayors, governors, municipal officials, civil society leaders, businesses and financiers to engage in lively exchanges on accelerating local and regional climate action. The Pavilion provides a forum for mobilizing resources and building partnerships, representing an important milestone in a larger effort to strengthen local and regional governments as crucial agents of positive and long-term climate action.

The Pavilion will host debates, presentations and meetings that showcase the crucial contribution of cities and regions to global climate action. Sessions cover a wide range of topics, including climate finance, energy, ecomobility, smart cities, strategies for low-carbon development, city-business partnerships, resilience and adaptation.

At the heart of the two-week program are presentations by the most ambitious, cross-cutting and inclusive climate projects of the Transformative Actions Program (TAP), selected among more than 120 projects submitted to the TAP by 88 cities and regions in 42 countries. At the Pavilion, cities and regions are saying #WeAreReady to act now and raise global climate ambitions, working alongside with the many actors that support them.

For more information on the TAP, please visit [www.tap-potential.org](http://www.tap-potential.org)

## Cities & Regions Pavilion Program

WE  
ARE  
READY

Cities & Regions  
Pavilion - TAP2015

Cities & regions are ready to raise  
climate ambitions at COP21 and beyond!

The Pavilion will take place from **1-11 December 2015** in the Climate Generations Areas, the designated civil society area at the COP21 site in Le Bourget, located near the Blue Zone where the international negotiations will occur. Turn right at the main entrance of the Climate Generations Areas to find the Pavilion in Zone B.

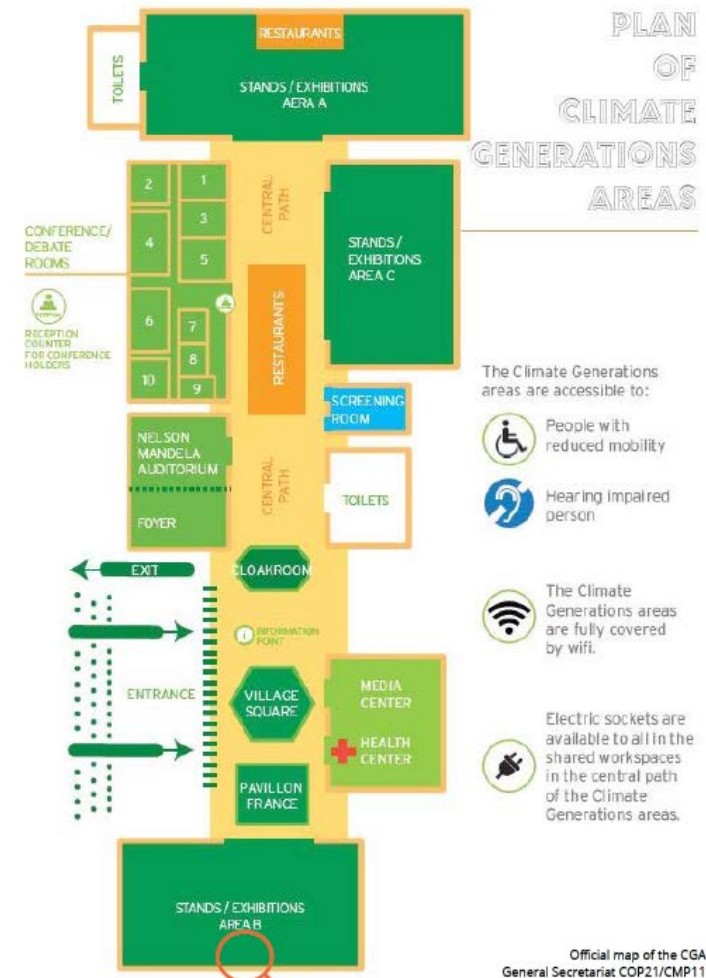

The Pavilion is located in a 310m<sup>2</sup> space, designed for both open debate and discussion as well as bilateral meetings and workshops.

It consists of two main spaces, with separate programs running in parallel: the Agora Hall, a large room holding 125 people for presentations and panel sessions, and the Workshop Room, an enclosed room for bilateral meetings and workshops.

A media corner will also be equipped for video interviews of Pavilion speakers and participants, depending on availability.

[Registration to the Pavilion](#) is highly recommended. Access to the Green Zone is open to anyone, but additional security measures and restriction of access might be implemented for non-registered visitors.

More logistical information is available at [cities-and-regions.org/practical-info](http://cities-and-regions.org/practical-info).

AFD, the “Agence Française de Développement,” is a public development finance institution that has worked for more than seventy years to alleviate poverty and foster sustainable development in the developing world and French Overseas Provinces. The Agency implements the French government’s development aid policies. AFD operates via seventy-one field offices and bureaus located on four continents to provide financing and support for projects that improve living conditions, promote economic growth and protect the planet.

In 2014, the AFD Group – including PROPARCO, AFD’s subsidiary dedicated to private investment – committed €8.1 billion to finance projects in developing countries, emerging countries and in the French for Overseas Provinces. With a commitment of €2.8 billion of climate finance in 2014, AFD is a leading and innovative actor in financing the fight against climate change to support a development that reconciles economic, social, and environmental and climate issues.

## THE THIRD INDUSTRIAL REVOLUTION IS ALREADY A REALITY IN NORD-PAS DE CALAIS !

Further to the first industrial revolution linked to coal during the 19th century and the second one connected with oil during the 20th century, the Third Industrial Revolution represents the post-carbon transformation towards which all Nord-Pas de Calais inhabitants and economic players have been working since 2013, in order to build a solid

and positive future for their region.

Combining mainly the development of renewable energies with new digital technologies, the Nord-Pas de Calais action plan is based on the concept elaborated by the American prospectivist, Jeremy Rifkin, to create a new social and economic paradigm for the generations to come.

# Supporting Sustainable Cities

## A City-based Approach

Cities are on the front line in dealing with some of the most pressing development and environmental challenges, and hold the key to solutions.

Our event, *Sustainable Cities Integrated Approach Pilot: A City-based Approach*, will engage urban practitioners, MDBs, and planning experts to discuss how a city-based approach can deliver adaptation and mitigation benefits at scale, along with multiple environmental and development benefits at the national, regional and global level.

Date: Wednesday, December 9 | Time: 11:15-12:45 | Venue: Agora Hall TAP

**Local Government  
Climate Roadmap**

## Recognize. Engage. Empower.

Despite the immense potential and power of local and subnational climate action, neither the UN Framework Convention on Climate Change (UNFCCC) nor its Kyoto Protocol included any reference to local and subnational governments. As a response, the Local Government Climate Roadmap was launched as a global advocacy movement at the UN Bali Climate Conference (COP13) in 2007. It is facilitated by ICLEI – Local Governments for Sustainability in its capacity as the focal point of Local Governments and Municipal Authorities (LGMA) Constituency to the UNFCCC.

After eight years of immense mobilization at all levels, the Local Government Climate Roadmap managed to reach its overarching goals on **Recognition** (e.g. through COP decisions), **Engagement** (e.g. in ADP Technical Examination Processes, NAZCA Platform, High Level Dialogues and special accreditations) and **Empowerment** (e.g. with new financing programs).

## Session Description

Draft as of 8 December 2015

### East Asia TAP Time

**Date:** 9 December 2015

**Time:** 15:00 – 16:00

**Room:** Agora Hall

**Contact:** Atte Oksanen

**Email:** [atte.oksanen@iclei.org](mailto:atte.oksanen@iclei.org)

**Supported by:** Transformative Actions Program

### Description

Co-organized with endorsing local government networks and partners, the regional TAP Time sessions will showcase selected local and subnational transformative climate projects and action plans to a multi-sector audience.

A TAP Time session will be dedicated to showcasing TAP projects from East Asia.

### Project presentations

- **Taichung, “City Food Forest”** presented by Kai-Wen Tsao, Taichung City Government

- **Pingtung, “Green Energy Innovation: The Smart Micro-Grids”** presented by Calvin Wen, Confidential Assistant to Director of Environment Protection Bureau of Pingtung County Government

- **Kaohsiung, “Kaohsiung Climate Change Adaptation and Sustainability Promotion Program”** presented by Yi I-Tsen Chen, associate Technical Specialist of Kaohsiung City Government

### Methodology

- Moderated by Chinghui Liao, Acting Director of the Kaohsiung Capacity Center

Cities & Regions  
Pavilion **TAP 2015**  
30 NOV - 11 DEC • COP21, PARIS

Co-Hosts of Cities and Regions Pavilion at Climate Generations Areas at Le Bourget:

## Cities and Regions Pavilion – TAP 2015

30 November – 11 December 2015

Climate Generations Areas, COP21, Paris–Le Bourget, France

### Cities in Chinese Taipei

**Date:** Thursday, 10 December 2015

**Time:** 17:30 -18:30

**Room:** Agora Hall

**Contact:** Chinghui Liao

**Email:** [chinghui.liao@iclei.org](mailto:chinghui.liao@iclei.org)

**Supported by:** ICLEI

#### Description

In recent years, in response to the climate change and beyond, local governments in Chinese Taipei are playing an increasing role in the mitigation, adaptation actions, and much more sustainable action plans with wide spectrum, such as community participation on sustainability and capacity building for young generation, female leadership on environmental education and their contribution to communities, Agri-solar panels as both green economy and adaptation strategy, the conflict between economic and environment in Aerotropolis areas and so on.

This session aims to showcase and to promote urban sustainability in cities in Formosa and to share the best practices between cities. Along with city actions, NGOs and private sectors also work together through public-private partnership relations, toward the same sustainability goals.

#### Methodology and Speakers

##### Introduction from the facilitator [5 minutes]

Ching-Hui Liao, Acting Director, ICLEI Kaohsiung Capacity Center, Chinese Taipei

##### Presentations

- *Taoyuan Aerotropolis – communication with residents about the conflict between economic and environment*, Mr. Tai-San Chiu, Deputy Mayor, City of Taoyuan, Chinese Taipei **[10 minutes]**
- *Stories of female environmental volunteers and their contribution to our society in Taichung*, Chung-Tien Huang, CEO, Low Carbon City Promotion Office, Taichung City Government, Chinese Taipei **[10 minutes]**
